

Radiation Protection Supervisor's Course

A one day programme about the new 2018 Ionising Radiations Regulations

DATE: Tuesday 27th February 2018

VENUE: R Floor, Royal Hallamshire Hospital, Sheffield

COST: Details will be given on application.

This course is primarily intended for persons who are already working as a radiology or nuclear medicine Radiation Protection Supervisor and who have previously attended RPS training

This course will present the changes arising from the new Ionising Radiations Regulations which will be implemented in 2018

The course will also address requirements of patient protection and environmental protection regulations

The morning session will cover the following topics:

- **The new Ionising Radiations Regulations**
- **The new Ionising Radiations (Medical Exposure) Regulations**
 - **RPS roles and responsibilities**
 - **Risk Assessment**
- **A scenario-based tutorial – “It shouldn't happen to an RPS”**

Following lunch, the session will be split into two streams - those specific to X-ray Radiology and those relating specifically to Nuclear Medicine
